SOUVENIR OF

PARK CITY

HER MINES, MINING AND PLEASURE RESORTS.

Photographed and Copyrighted, Dec. 1891. by Jas. H. Crockwell.
Salt Lake City, Utah,

The Albertype Co., N. Y.,

Compliments of

McLaughlin & Co.,

General Merchandise,

Park City, Utah.

For the descriptive we are indebted to C. S. Austin of Park City.

DESCRIPTIVE.

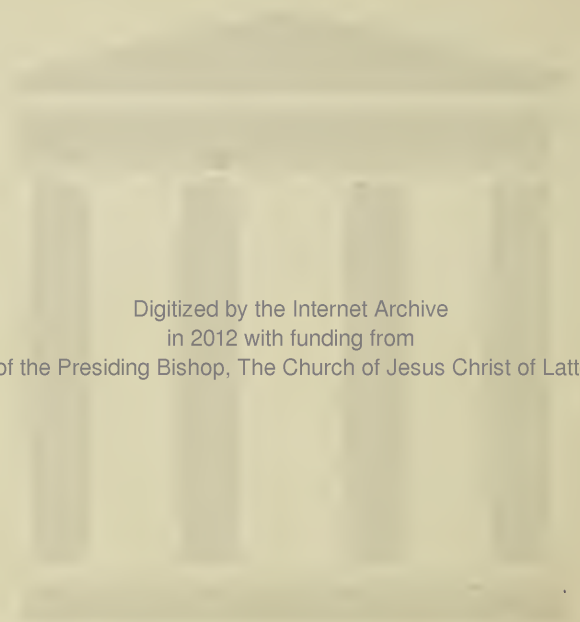

It will readily be noticed that in the limited space here allotted for the purpose, any description written of Park City and its resources must of necessity be succinct and to the point. Park City is a prosperous mining camp, embracing a population of quite 7,000 people. It is situated in the Wasatch range of mountains at an elevation of 7,200 feet above sea level. The camp is about 32 miles from Salt Lake City, the metropolis of Utah and 70 miles from Ogden, the recognized "Junction City" of the territory. With both of these cities, Park City is connected by railways—with the former by the Union Pacific and the Utah Central, the Mountain Scenic Route and the latter by the Union Pacific.

Park City is without doubt the most prosperous city in the territory, and for this prosperity is dependent solely on the mining industry. The claim is justly made that it is the greatest mining camp in Utah and that in the years to come it will stand pre eminent in the proud phalanx of mining camps in the great west. It is the home of the Ontario Silver Mine, that "bonanza" of modern times which is to-day the greatest silver producing mine in the United States, if not in the world, and whose dividends to date amount to over twelve millions of dollars, which sum is being continually augmented at the rate of \$75,000 a month. Then, there is the Daly Silver Mine, another "wonder of the hills," whose dividends to date reach the magnificent sum of \$2,137,000 and are being added to at the rate of \$37,500 a month. Following these come the Anchor, the Crescent, the Mayflower, the Woodside, the Glencoe, the Northland—all producers giving promise of paying handsome dividends in the future. The district also embraces a wonderful area of undeveloped mineral ground, which, for want of sufficient capital to prosecute work, lies dormant. Park City is what is termed a deep mining camp, and because of the vast outlay necessary to make in properly developing a property, work in that line has been necessarily slow. Practical knowledge of mining, backed by plenty of capital, is a necessary essential here and where vigorously applied, has never been known to go unrewarded.

It is estimated that no less than \$125,000 a month is expended for labor in Park City every month in the year and in consequence the dearth in business which so often characterizes cities dependent upon agriculture for existence is never known here,

The city is also rich in churches and schools, and in point of morality may justly be said to rank first among western mining camps.

Park City, owing to her high altitude is an excellent summer resort and has in a radius of a few miles over 20 lakes at an elevation of nine to ten thousand feet, also the noted Hot Pot Bathing resort at Midway.
